

B10T Bench Adapter

The UnoLiner B10T Bench Adapter has been specifically designed for UnoLiner's two-way locking benches. These benches, such as the CRS4600T and CRS6000T, feature extra profiles on top for adapter and accessory placement. The B10T locks onto the top profile, keeping the side profiles completely available for drive-on ramps, pulling towers, down pull adapters, and other repair equipment.

Features

- ✓ Bench adapter for two-way locking benches
- ✓ Compatible with all UnoLiner chassis clamps
- ✓ Easy to mount on top profile
